## Congo

- There are an estimated 1,000 people dying there every day as a result of hunger and disease caused by war.
- Since the 1960s, the Congolese have endured over two decades of armed conflict with over 5.4 million people dead due to war-related causes, making it the deadliest conflict since World War II.
- In the DRC, only 1.8% of existing roads are tarred and less than 10% of the population has access to electricity today.
- About 450,000 refugees from the DRC remain in neighboring countries, particularly Burundi, Rwanda, Tanzania, and Uganda.
- The DRC is among the most resource-rich countries on the planet, with an abundance of gold, tantalum, tungsten, and tin
- The area experiences a population increase of 1.7 million people each year
- It is the fourth most dangerous country
- Congo is the world's most dangerous place for women.

## Belgium

- Belgium holds the world record for the longest period without a government
- Belgium produces more than 220,000 tons of chocolate per year
- Robert Cailliau, co-inventor of the World Wide Web, is a Belgian.
